

# MULTI-C

- High-quality THIN lubricant based on ceramic particles (up to +2000°C).
- Thin lubricating film for precision lubrication.
- Long lasting effect, doesn't dry out and doesn't freeze down to -50°C.
- Doesn't sag.
- Silicone-free.
- Doesn't attack plastic, metal or rubbers.
- Food approved NSF-H1, No. 167864.

## Applications:

Ideal for use in places where there is a risk of fire and explosion. Is refillable and ecological. MULTI-C can be used very widely, even in the food industry and refrigeration installations due to its NSF-H1 registration. Also for lubricating precision instruments and all moving parts such as: chains, bearings, doors, sliding windows, switches, conveyor belts, gears, cables, sawing machines, packaging machines, looms, threaded rods, mounting of rubbers, cranes,...

<u>Art.No.</u>	<u>Product</u>	<u>Packaging</u>
E100063	MULTI-C + VERSTUIVER FLES	500 ML

## TECHNICAL SPECS

Color:	White
Temperature resistance:	-50°C to +2000°C
Ceramic particles:	0,3 - 0,4 micron
MOAH:	0%
Doesn't contain chlorinated substances.	

## Instructions for use

Clean the parts to be treated with MTCLEANER and then apply a layer of MULTI-C Preliminary testing is necessary. Ensure that the product is suitable for your chosen application. Consult the technical and safety data sheet.
