TECHNICAL SPECS

Density:	1,030 - 1,080
PH value:	10
Water solubility:	Fully.
Physical form:	Yellow-colored liquid.
Odor:	Gentle

Instructions for use

Dilute as necessary to a concentration of 1/10 depending on the level of dirt.

Always test the surface for color fastness prior to treatment. FLOOR & MAXI CLEANER is suitable for machine use; minimum foam generation ensures optimum cleaning. In case of manual use: spray onto surface and leave for about 2 minutes. Brush the deep dirt with a hard brush. Always rinse with plenty of water. When used on textile, always treat the entire surface.

Don't leave to dry on glass as the product may leave permanent stains. Always rinse thoroughly.
