H100120	BODY COATING	500 ML

TECHNICAL SPECS

Colour:	Black
Solids content (DIN 53216):	28 - 31%
Density (20°C) (DIN 51757):	0.763 kg/l
Flash point (ASTM D 1310-67):	-9 °C
Salt spray test (DIN 50021):	> 200 uur

Instructions for use

Make the treated surface free from rust, grease and oil. Make sure the surface is dust free and dry. Shake very well before use. Apply the coating in a number of layers crosswise. Recommended film thickness is approximately 500 microns. After use, Spray with the spray in reverse way until there is only gas left, this to prevent from obstruction.

PLEASE NOTE: Do not spray on the engine, gearbox, brake parts or exhaust device!
